

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of: Spencer A. Rathus, et al.

Serial No.: TO BE ASSIGNED

Group Art Unit: TBA

Filed: January 25, 2001

Examiner: TBA

For: METHOD AND APPARATUS FOR  
ACCESSING ELECTRONIC DATA  
VIA A FAMILIAR PRINTED MEDIUM

Atty. Doc. No.: 660-023

Honorable Commissioner of Patents and Trademarks  
Washington, D.C. 20231

**SUPPLEMENTAL PRELIMINARY AMENDMENT**

Prior to substantive review of the subject application,  
please amend as follows:

**IN THE CLAIMS**

Please cancel claims 1-167. Please add the following new  
claims:

168. A system for displaying programming to a user, the system  
comprising:

a printed photograph having at least one machine  
recognizable feature;

a feature recognition unit having associated therewith  
a means for recognizing said feature and a means  
for transmitting a coded signal in response to the

**PATENT**  
**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

recognition of said feature;

an intelligent controller having associated therewith a  
means for accessing said programming material in  
response to receiving said coded signal; and  
a display unit for presenting said programming  
material.

169. A system as defined in claim 168 wherein said at least one  
machine recognizable feature has associated therewith a data  
link which is recognized by said feature recognition unit.

170. A system as defined in claim 169 wherein said data link  
comprises an image data link.

171. A system as defined in claim 169 wherein said data link  
comprises a video data link.

172. A system as defined in claim 169 wherein said data link  
comprises a programming data link.

173. A system as defined in claim 169 wherein said data link

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

comprises a sound data link.

174. A system as defined in claim 169 wherein said data link comprises an on-line data link.

175. A system as defined in claim 169 wherein said data link comprises an on-line shopping data link.

176. A system as defined in claim 169 wherein said data link comprises a pictorial data link.

177. A system as defined in claim 169 wherein said data link comprises an electronic data link.

178. A system as defined in claim 169 wherein said data link comprises an electronic media link.

179. A system as defined in claim 169 wherein said data link comprises an "information superhighway" data link.

180. A system as defined in claim 179 wherein said "information

174. A system as defined in claim 169 wherein said data link comprises an on-line data link.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

superhighway" data link comprises the internet.

181. A system as defined in claim 179 wherein said "information superhighway" data link comprises the world wide web.

182. A system as defined in claim 179 wherein said "information superhighway" data link comprises a computer network.

183. A system as defined in claim 179 wherein said "information superhighway" data link comprises an ISDN network.

184. A system as defined in claim 179 wherein said "information superhighway" data link comprises a telephone line.

185. A system as defined in claim 179 wherein said "information superhighway" data link comprises a CATV line.

186. A system as defined in claim 179 wherein said "information superhighway" data link comprises a local area network.

187. A system as defined in claim 179 wherein said "information

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

superhighway" data link comprises a wide area network.

188. A system as defined in claim 179 wherein said "information superhighway" data link comprises a data communications network.

189. A system as defined in claim 179 wherein said "information superhighway" data link comprises an Internet Product Service Directory.

190. A system as defined in claim 179 wherein said "information superhighway" data link comprises a globally based digital communications network.

191. A system as defined in claim 179 wherein said "information superhighway" data link comprises a wireless network link.

192. A system as defined in claim 179 wherein said "information superhighway" data link comprises a Wireless Application Protocol internet.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

193. A system as defined in claim 179 wherein said "information superhighway" data link comprises an ethernet network.

194. A system as defined in claim 179 wherein said "information superhighway" data link comprises a RF cellular network.

195. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a bar code.

196. A system as defined in claim 195 wherein said bar code comprises a Universal Product Code.

197. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an invisible bar code.

198. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a magnetic code.

199. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a printed character.

**PATENT**  
**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

200. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a symbol.

201. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a pictorial icon.

202. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an invisible indicia.

203. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a two-dimensional figure.

204. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an icon.

205. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an invisible icon.

206. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a watermark.

PATENT  
IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

207. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an invisible watermark.

208. A system as defined in claim 207 wherein said invisible watermark comprises a digital watermark.

209. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a series of alphanumeric characters.

210. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a binary code.

211. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a digital watermark.

212. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a magnetic strip.

213. A system as defined in claim 168 wherein said at least one

**PATENT**  
**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

machine recognizable feature comprises a code.

214. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an online shopping product code.

215. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a home shopping product code.

216. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an online shopping service code.

217. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a home shopping service code.

218. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an analog pattern.

**PATENT**  
**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

219. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a hieroglyphic character.

220. A system as defined in claim in 168 wherein said programming material comprises information.

221. A system as defined in claim 220 wherein said information comprises information about the photographer of said photograph.

222. A system as defined in claim 220 wherein said information comprises photograph identification information.

223. A system as defined in claim 222 wherein said photograph identification information comprises the date of the photograph.

224. A system as defined in claim 222 wherein said photograph identification information comprises the time of the photograph.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

225. A system as defined in claim 222 wherein said photograph identification information comprises the location of the photograph.
226. A system as defined in claim 220 wherein said information comprises information about the owner of the photograph.
227. A system as defined in claim 220 wherein said information comprises information about the agency representing the photographer.
228. A system as defined in claim 220 wherein said information comprises information about related photographic works.
229. A system as defined in claim 220 wherein said information comprises information about purchasing said photograph.
230. A system as defined in claim 220 wherein said information comprises information about obtaining licensing rights to utilize said photograph in a printed medium.

**PATENT**

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

231. A system as defined in claim 220 wherein said information comprises information about obtaining licensing rights to utilize said photograph in an electronic medium.
232. A system as defined in claim 220 wherein said information comprises information about obtaining licensing rights to exhibit said photograph.
233. A system as defined in claim 220 wherein said information comprises information related to the subject matter of said photograph.
234. A system as defined in claim 220 wherein said information comprises information about art galleries exhibiting photographs.
235. A system as defined in claim 220 wherein said information comprises information about museums exhibiting photographs.
236. A system as defined in claim 220 wherein said information comprises information about the individuals depicted in said

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

photograph.

237. A system as defined in claim 220 wherein said information comprises information about the photography techniques employed in producing said photograph.

238. A system as defined in claim 220 wherein said information comprises information about the photography equipment employed in producing said photograph.

239. A system as defined in claim 220 wherein said information comprises information about the developer of said photograph.

240. A system as defined in claim 220 wherein said information comprises information about the users of the photograph.

241. A system as defined in claim 220 wherein said information comprises information about the provenance of the photograph.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

242. A system as defined in claim 168 wherein said programming material comprises a service.
243. A system as defined in claim 242 wherein said service includes displaying promotional programming on said display unit of said user.
244. A system as defined in claim 242 wherein said service includes conducting an interaction with said user via a telephone.
245. A system as defined in claim 242 wherein said service includes conducting an interaction between a plurality of users via an online communication chat link.
246. A system as defined in claim 242 wherein said service includes establishing a communication link enabling a user to purchase said photograph.
247. A system as defined in claim 242 wherein said service includes establishing a communication link enabling a user

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

to purchase a copy of said photograph.

248. A system as defined in claim 242 wherein said service includes establishing a communication link enabling a user to purchase related photographs.

249. A system as defined in claim 242 wherein said service includes establishing a communication link enabling a user to access a catalog of photographic images.

250. A system as defined in claim 242 wherein said service includes establishing a communication link enabling an individual to track the user of said photograph.

251. A system as defined in claim 242 wherein said service includes establishing a communication link enabling an organization to track the user of said photograph.

252. A system as defined in claim 242 wherein said service includes establishing a communication link enabling a user to forward a information about said photographs to others.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

253. A system as defined in claim 168 wherein said display unit comprises a personal computer.

254. A system as defined in claim 253 wherein said personal computer comprises a laptop computer.

255. A system as defined in claim 168 wherein said display unit comprises a television.

256. A system as defined in claim 168 wherein said display unit comprises a device containing a microprocessor.

257. A system as defined in claim 256 wherein said device containing a microprocessor is hand-held.

258. A system as defined in claim 256 wherein said device containing a microprocessor is portable.

259. A system as defined in claim 168 wherein said display unit comprises a personal digital planner.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

260. A system as defined in claim 168 wherein said display unit comprises an internet appliance.
261. A system as defined in claim 168 wherein said display unit comprises a cellular telephone.
262. A system as defined in claim 168 wherein said display unit comprises a wireless communication device.
263. A system as defined in claim 168 wherein said display unit comprises a simulated book.
264. A system as defined in claim 168 wherein said display unit comprises an intelligent terminal.
265. A system as defined in claim 168 wherein said display unit comprises a web-based television.
266. A system as defined in claim 168 wherein said display unit comprises a pager.

COPIES OF THIS DOCUMENT ARE AVAILABLE FROM THE NATIONAL ARCHIVES AT COLLEGE PARK, MARYLAND 20740-6001

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

267. A system as defined in claim 168 wherein said display unit comprises an Internet-enabled telephone.

268. A system as defined in claim 168 wherein said recognition unit is selected from a group consisting of a hand-held unit, a scanner, a bar code scanner, an optical code reader, an optical reader, a personal camera, a personal computer reader, a digital camera, a digital mouse and an optical mouse.

269. A system as defined in claim 268 wherein said recognition unit is linked to a personal computer.

270. A system as defined in claim 268 wherein said recognition unit is linked to a wireless interface.

271. A system as defined in claim 270 wherein said wireless interface comprises a wireless network.

272. A system as defined in claim 271 wherein said wireless network comprises a cellular network.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

273. A system as defined in claim 270 wherein said wireless interface comprises a cellular telephone.

274. A system as defined in claim 270 wherein said wireless interface comprises a pager.

275. A system as defined in claim 270 wherein said wireless interface comprises a wireless personal computer.

276. A system as defined in claim 270 wherein said wireless interface comprises a personal digital assistant.

277. A system as defined in claim 268 wherein said recognition unit is linked to a personal digital assistant.

278. A system as defined in claim 268 wherein said recognition unit is linked to an Internet appliance.

279. A system as defined in claim 268 wherein said recognition unit is linked to a television set.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

280. A system as defined in claim 268 wherein said recognition unit comprises a portion of a cellular telephone.

281. A system as defined in claim 268 wherein said recognition unit comprises a portion of a personal digital assistant.

282. A system as defined in claim 268 wherein said recognition unit comprises a portion of a remote control unit.

283. A system as defined in claim 268 wherein said recognition unit comprises a portion of a handwriting implement.

284. A method of providing a user access to programming material, comprising the steps of:

imprinting a machine recognizable feature within a  
photograph;

scanning said machine recognizable feature of said  
photograph; and

transmitting data associated with said machine  
recognizable feature via a communication link to  
access said programming material, wherein said

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

programming material is related to said  
photograph.

285. The method of claim 284 wherein said communication link  
includes the Internet.

286. The method of claim 284 wherein said machine recognizable  
feature is selected from a group consisting of bar code,  
universal product code, invisible bar code, magnetic code,  
printed character, symbol, icon, invisible indicia, two-  
dimensional figure, icon, invisible icon, watermark,  
invisible watermark, digital watermark, series of  
alphanumeric characters, binary code, digital watermark,  
magnetic strip, code, analog pattern, and hieroglyphic  
character.

287. A method of providing a user access to supplemental  
programming material associated with a photograph,  
comprising the steps of:

imprinting a machine recognizable feature within said  
photograph wherein said machine recognizable

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

feature has associated therewith a command  
sequence for accessing programming material;  
scanning said machine recognizable feature within said  
photograph and downloading data indicative of said  
machine recognizable feature via the Internet to a  
remote server;  
accessing programming material from said remote server;  
and  
transmitting said programming material to said user  
allowing said user to perceive said programming  
material in a humanly perceivable form, wherein  
said programming material is related to said  
photograph.

288. The method of claim 287 wherein said programming material  
comprises multimedia.

289. The method of claim 287 wherein said machine recognizable  
feature is selected from a group consisting of a bar code, a  
universal product code, invisible bar code, magnetic code,  
printed character, symbol, icon, invisible indicia, two-
